PRESENTATION:

Highly motivated Fullstack Developer student at Nackademin with a strong background in technical problem-solving and self-learning. Experienced in building and deploying scalable web applications using the MERN/PERN stack. Skilled in DevOps practices, including Docker and Nginx server management. Seeking an internship or junior role to contribute to a professional team and solve real-world technical challenges.

SKILLS:

- ✅ **Frontend**: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind CSS, Framer Motion, React Router.
- ✅ **Backend**: Node.js, Express.js, PostgreSQL, MongoDB, Mongoose, RESTful APIs, Firebase.
- ✅ **DevOps & Tools**: Docker, Nginx Proxy Manager, Linux (Ubuntu), Git, GitHub, Postman, npm, VS Code.
- ✅ **Languages**: Good: English, Swedish, Turkish, Native: Arabic.

PROFESSIONAL EXPERIENCE:

Mobile Phone Repair Technician

Vodafone, Ankara | 2012 – 2021

- Performed advanced troubleshooting and hardware/software repairs for mobile devices.
- Provided technical consultancy to customers, identifying and resolving complex issues.
- Developed strong analytical thinking and precision, skills now applied to debugging and software architecture.

RELEVANT PROJECTS:

SEPower Store (Next.js + Tailwind CSS)

Student Fullstack Developer | 2026

- Developed a premium e-commerce frontend inspired by the Swedish market (Power.se).
- Focused on localization, performance optimization, and clean UI using Tailwind.
- Implemented responsive design patterns for a seamless mobile and desktop experience.

Library Management System (Fullstack - Node.js + PostgreSQL)

Student Fullstack Developer | 2026

- Built a robust system for managing books and users with full CRUD functionality.
- Containerized the entire application using Docker for consistent deployment.
- Managed database migrations and complex queries using PostgreSQL.

Pokémon Explorer (React + PokeAPI + Framer Motion)

Student Fullstack Developer | 2025

- Created a high-performance search engine utilizing external APIs.
- Implemented smooth UI transitions and animations using Framer Motion.
- Built dynamic routing to display detailed information for 151+ items.

EDUCATION:

Web Developer - Fullstack Open Source

Nackademin, Stockholm | 2025 – 2027

- Focusing on modern web architecture, cloud deployment, and CI/CD pipelines.

Law Student

Damascus University | 2008 – 2012

- Developed critical thinking and structured analysis of complex texts and systems.
